PROFESSIONAL SUMMARY

Early-career Software Engineer with hands-on experience building, maintaining, and enhancing production web applications using **.NET, C#, React, and TypeScript.** Experienced across **full-stack development, legacy system maintenance,** and modern client-facing applications. Actively seeking a full-time junior or graduate software engineering role.

TECHNICAL SKILLS

Languages : **C#,** JavaScript, **TypeScript**, Python
Frameworks & Libraries: ASP.NET MVC, **.NET Core, React**, **Node.js**, NestJS, Astro
Frontend Development: **React**, HTML, CSS, modern JavaScript frameworks
Backend Development: **RESTful APIs**, server-side development, **MVC architecture**
Databases: **SQL Server**, PostgreSQL, SQL
Tools & Platforms: **Git**, **GitHub**, CI/CD basics, cloud & serverless platforms
Practices: **Clean code**, problem solving, agile development, team collaboration

---

PROFESSIONAL EXPERIENCE

Doctorware - Software Engineer (Part-time), Melbourne, Australia   **Mar 2025 - Present**

- Maintain and enhance legacy healthcare systems used in production environments
- Collaborate with cross-functional teams to improve system performance and reliability
- Explore and implement modern architectural improvements within existing systems
- Work with healthcare data standards to ensure secure and compliant solutions
- Utilise the 4D development environment to support mission-critical applications

Outback Yak - Associate Software Developer (Contract), Melbourne, Australia   **Jul 2024 - Feb 2025**

- Developed client-facing web applications using React, TypeScript, and Astro
- Delivered responsive, intuitive user interfaces with a focus on performance and usability
- Deployed applications on serverless platforms, optimising scalability and reliability
- Worked directly with clients to gather requirements and translate them into technical solutions
- Contributed to code reviews and maintained high code quality standards

Danfe Solution — Junior .NET Developer (Full-time), Kathmandu, Nepal   **Jul 2022 - Sep 2023**

- Enhanced a production Restaurant Management System using ASP.NET, C#, jQuery, and SQL Server
- Designed and implemented new features while refactoring legacy components for maintainability
- Applied software design principles to deliver scalable, testable backend solutions
- Collaborated with senior developers and stakeholders in an agile team environment
- Gained hands-on experience maintaining real-world enterprise applications

---

EDUCATION

Masters of Information Technology
Majors: Artificial Inteligence
APIC College (Melbourne, Australia)
Year of Graduation: 2025

Bachelors of Information Technology
Islington College (Kathmandu, Nepal)
Year of Graduation: 2022
